

## VYAS CONSULTANCY SERVICES

Office Address: 3, Paper Box Rd, Satya Darshan Colony, Gundavali, Andheri East, Mumbai, Maharashtra 400047

### Position: Full Stack Developer

Location: Mumbai

Duration: Full-Time

Industry: Cybersecurity

#### About Us:

Vyas Consultancy Services (VCS) is dedicated to providing advanced cybersecurity solutions to safeguard businesses from cyber threats. We are looking for a versatile IT professional to maintain our website, optimize our digital presence, and support our marketing efforts.

#### Role Overview:

We are seeking a motivated and talented Full Stack Developer Intern to join our dynamic team. As an intern, you will gain hands-on experience in designing, developing, and maintaining both front-end and back-end systems. You will collaborate with cross-functional teams, work on real-world projects, and contribute to building scalable, secure, and user-friendly applications.

#### Key Responsibilities:

1. Front-End Development: Design and implement responsive and intuitive user interfaces using frameworks like React, Angular, or Vue.js. Optimize web pages for speed, usability, and cross-browser compatibility.
2. Back-End Development: Develop and maintain robust server-side applications using languages such as Node.js, Python, or Java. Work with databases (SQL or NoSQL) to design efficient data models and implement queries.
3. API Development and Integration: Create and manage RESTful APIs to support application functionality. Integrate third-party APIs and services seamlessly into the platform.
4. DevOps & Deployment: Assist with deploying applications to cloud platforms like AWS, Azure, or Google Cloud. Monitor application performance and troubleshoot issues in production environments.
5. Analytics & Reporting: Use tools like Google Analytics to track website traffic, campaign performance, and conversions. Provide insights to improve marketing strategies.

#### Skills & Qualifications:

1. Website Development/Management: Experience with front-end technologies like HTML, CSS, JavaScript, and modern frameworks (e.g., React, Angular, or Vue.js). Proficiency in back-end languages such as Node.js, Python, Java, or PHP.
2. Database Knowledge: Familiarity with relational databases (e.g., MySQL, PostgreSQL) and NoSQL databases (e.g., MongoDB).
3. Technical Proficiency: Strong IT skills with the ability to troubleshoot technical issues related to website and digital tools.
4. SEO & SEM Expertise: Proven experience in search engine optimization (SEO) and search engine marketing (SEM), with familiarity in using tools like Google Search Console, SEMrush, and Ahrefs. (optional)

#### Education & Experience:

1. Currently pursuing or recently completed a degree in Computer Science, Software Engineering, or a related field.
2. Prior experience with personal or academic projects involving full-stack development.
3. Familiarity with cybersecurity industry terms and concepts is a plus.

#### Benefits:

1. Growth Potential: Be a part of an evolving cybersecurity startup with opportunities to grow.
2. Skill Development: Expand your IT and digital marketing skills by working in a dynamic environment.
3. Flexible Work Environment: Remote and hybrid options are available to support work-life balance.
